附件二

英文版导师简介
电气工程学院

	LIANG Deliang Professor Department: Electric Machinery Research Area(s): 1: Control and simulation of servo systems 2: New principle electromagnetic theory and CAD technology 3: Analysis and implementation of electromagnetic devices and systems 4: Theory and control of special motor electromagnetic 5: Motor technology in new energy power generation E-mail: dlliang@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/dlliang
	WANG Shuhong Professor Department: Electric Machinery Research Area(s): 1: Theory, numerical analysis methods and software techniques for circuits, electromagnetic fields and multi physics 2: Design, simulation and optimization of electrical energy conversion and transmission equipment and special electromagnetic devices 3: Modeling and simulation of electromagnetic properties of advanced electrical materials (superconducting materials, magnetic materials, etc.) 4: Application of superconducting power technology E-mail: shwang@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/shwang

	DING Wen Associate Professor Department: Electric Machinery Research Area(s): 1: Switched reluctance motor for aviation/electric vehicles and its control technology 2: Special motor (flux switching motor, synchronous reluctance motor, etc.) and its control technology 3: Permanent magnet synchronous motor, brushless DC motor and its control technology 4: Simulation and implementation of high efficiency motor and its control system E-mail: wending@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/wending
	LIU Xinzheng Associate Professor Department: Electric Machinery Research Area(s): 1: Design and simulation analysis of special motors and their control systems 2: Computer control technology of the motors 3: Wind power generation system E-mail: liuxz@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/liuxz
	GAO Lin Associate Professor Department: Electric Machinery Research Area(s): 1: Design and drive control of servo motor 2: Monitor of motor temperature rise 3: High efficiency and energy conservation motor E-mail: lgao@mail.xjtu.edu.cn Homepage: http:// liuyiying.gr.xjtu.edu.cn
	LOU Jianyong Associate Professor Department: Electric Machinery Research Area(s): 1: Numerical analysis and motor optimization design of electromagnetic devices 2: Theory, operation and control of special motors 3: Aviation start, power generation system and wind power generation technology E-mail: jylou@mail.xjtu.edu.cn Homepage: http://ee.xjtu.edu.cn/info/1310/5597.htm

	LIU Ling Associate Professor Department: Electric Machinery Research Area(s): 1: Nonlinear circuit design 2: Intelligent control and application 3: Analysis and control of motor 4: Analysis of chaos and bifurcation E-mail: liul@mail.xjtu.edu.cn Homepage: http://ee.xjtu.edu.cn/info/1310/5595.htm
	KOU Peng Associate Professor Department: Electric Machinery Research Area(s): 1: New energy generation and smart microgrid 2: Advanced motor control 3: Predictive control and intelligent control E-mail: koupeng@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/koupeng
	DU Jinhua Associate Professor Department: Electric Machinery Research Area(s): 1: Wave power generation motor and drive control system 2: Hybrid vehicle motor and drive control system 3: Wind power motor and drive control system 4: Design and parameter analysis technology of transformer E-mail: jinhuadu@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/jinhuadu
	ZHANG Naming Lecturer Department: Electric Machinery Research Area(s): 1: Theoretical and numerical analysis methods for multi-physics of motors 2: Theoretical and experimental research on the effect of electromagnetic field on biological cells 3: Modeling and measurement of electromagnetic properties of advanced electrical materials (magnetic materials, biomaterials, etc.) 4: Simulation and Experimental Study on Plasma Effect of Metal Nanomaterials

	E-mail: namingzhang@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/namingzhang
	DUAN Nana Associate Professor Department: Electric Machinery Research Area(s): 1: Theory, numerical analysis methods and software techniques for circuits, electromagnetic fields and multiphysics 2: Modeling and simulation of electromagnetic properties of advanced electrical materials (superconducting materials, magnetic materials, etc.) 3: Application of superconducting power technology E-mail: duannana@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/duannana
	JIA Shaofeng Lecturer Department: Electric Machinery Research Area(s): 1: Theoretical and design study of magnetic field modulated permanent magnet motor and reluctance motor 2: Research on new energy automobile motor drive system 3: Research on new high-power motors such as wind power, ship propulsion and rail transit 4: Research on electromagnetic theory and control of special motors E-mail: shaofengjia@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/shaofengjia
	WANG Jianhua Professor Department: Electric Apparatus Research Area(s): 1: Theory and technology of intelligent electric apparatus 2: Vacuum arc theory and vacuum appliances E-mail: jhwang@mail.xjtu.edu.cn Homepage: http://ee.xjtu.edu.cn/info/1311/5641.htm

	RONG Mingzhe Professor Department: Electric Apparatus Research Area(s): 1: Electrical arc physics and electrical contact theory 2: Theory and technology of intelligent electric apparatus 3: Discharge plasma and its application E-mail: mzrong@xjtu.edu.cn Homepage: http://ee.xjtu.edu.cn/info/1311/5618.htm
	GENG Yingsan Professor Department: Electric Apparatus Research Area(s): 1: Theory and technology of intelligent electric apparatus 2: Computer aided design and simulation of electric apparatus E-mail: ysgeng@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/ysgeng
	XIU Shixin Professor Department: Electric Apparatus Research Area(s): 1: Vacuum arc theory and application 2: Electrical test and fault diagnosis technology 3: Simulation analysis of electric apparatus E-mail: xsx@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/xsx
	JIA Shenli Professor Department: Electric Apparatus Research Area(s): 1: Arc plasma and its application 2: New switch technology 3: Pulse power plasma E-mail: sljia@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/sljia

	SONG Zhengxiang Professor Department: Electric Apparatus Research Area(s): 1: Theory and technology of intelligent electric apparatus 2: Computer aided design and simulation of electric apparatus 3: Digital circuit fault diagnosis E-mail: zxsong@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/zxsong
	LIU Zhiyuan Professor Department: Electric Apparatus Research Area(s): 1: High voltage level vacuum circuit breaker technology 2: Vacuum Arc Theory E-mail: liuzy@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/liuzy
	WANG Lijun Professor Department: Electric Apparatus Research Area(s): 1: Arc theory and its application 2: Simulation and testing technology related to new power switchgear 3: Discharge plasma technology and its application E-mail: lijunwang@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/lijunwang
	SHI Zongqian Professor Department: Electric Apparatus Research Area(s): 1: Vacuum arc theory and its application 2: Large-capacity DC interruption technology 3: Discharge plasma and its application E-mail: zqshi@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/zqshi

	WU Yi Professor Department: Electric Apparatus Research Area(s): 1: DC interruption technology 2: Fault current limiting technology 3: Arc electric contact theory and its application E-mail: wuyic51@xjtu.edu.cn Homepage: http://ee.xjtu.edu.cn/info/1311/5640.htm
	WANG Xiaohua Professor Department: Electric Apparatus Research Area(s): 1: Electrical testing and fault diagnosis technology 2: Theory and technology of intelligent electric apparatus 3: Environmentally friendly switchgear design technology E-mail: xhw@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/xhw
	LI Xingwen Professor Department: Electric Apparatus Research Area(s): 1: High voltage and high current 2: Pulse power and discharge plasma E-mail: xwli@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/jds20
	LIU Dingxin Professor Department: Electric Apparatus Research Area(s): 1: Gas discharge and plasma technology 2: Power equipment status detection and diagnosis 3: Plasma biomedical technology E-mail: liudingxin@mail.xjtu.edu.cn Homepage: http://cpb.xjtu.edu.cn/info/1018/1076.htm

	YANG Fei Professor Department: Electric Apparatus Research Area(s): 1: Arc electric contact theory and its application 2: DC interruption theory and application 3: Research on new switchgear and electrical connector E-mail: yfei2007@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/yfei2007
	NIU Chunping Associate Professor Department: Electric Apparatus Research Area(s): 1: Design of new switchgear 2: Current limiting and interruption technology 3: Design and optimization of low voltage electric apparatus E-mail: niuyue@xjtu.edu.cn Homepage: http://ee.xjtu.edu.cn/info/1311/5613.htm
	ZHANG Guogang Associate Professor Department: Electric Apparatus Research Area(s): 1: Theory and technology of intelligent electric apparatus 2: Arc plasma and electrical contact 3: New energy power equipment E-mail: ggzhang@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/ggzhang
	ZHANG Hang Associate Professor Department: Electric Apparatus Research Area(s): 1: Design and research of intelligent electric apparatus 2: Design and research of embedded control system 3: Distributed control system design E-mail: **zhangh@mail.xjtu.edu.cn** Homepage: **http://gr.xjtu.edu.cn/web/zhangh**

	GUO Li Associate Professor Department: Electric Apparatus Research Area(s): 1: Biological effects of low temperature plasma on microorganisms and its molecular mechanism 2: Application of low temperature plasma in microbial related diseases E-mail: guoli35@mail.xjtu.edu.cn Homepage: http://cpb.xjtu.edu.cn/info/1018/1075.htm
	XU Dehui Associate Professor Department: Electric Apparatus Research Area(s): 1: Atmospheric pressure cold plasma biomedical application 2: Plasma tumor therapy 3: Plasma cell biological mechanism research E-mail: dehuixu@mail.xjtu.edu.cn Homepage: http://cpb.xjtu.edu.cn/info/1018/1245.htm
	WANG Zhenxing Associate Professor Department: Electric Apparatus Research Area(s): 1: Vacuum interrupter, plasma simulation and diagnosis E-mail: zxwang@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/zxwang
	WU Jian Professor Department: Electric Apparatus Research Area(s): 1: Pulse discharge plasma 2: Plasma diagnostic technology 3: Z pinch E-mail: jxjawj@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/jxjawj

	YANG Aijun Associate Professor Department: Electric Apparatus Research Area(s): 1: Artificial intelligence technology 2: Micro-nano sensor technology 3: Power equipment fault diagnosis and life assessment E-mail: yangaijun@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/yangaijun
	YAN Jing Lecturer Department: Electric Apparatus Research Area(s): 1: High voltage electrical theory and application 2: Theory and technology of intelligent electric apparatus E-mail: yanjing@mail.xjtu.edu.cn Homepage: http://ee.xjtu.edu.cn/info/1311/5662.htm
	ZHANG Boya Lecturer Department: Electric Apparatus Research Area(s): 1: Gas discharge phenomenon and mechanism research 2: Study on Charge Characteristics of Solid-Air Interface in GIS/GIL 3: SF6 alternative gas research 4: Pulse power and plasma technology E-mail: zhangby@xjtu.edu.cn Homepage: zhangby.gr.xjtu.edu.cn
	SHI Huantong Lecturer Department: Electric Apparatus Research Area(s): 1: Pulse power technology 2: Discharge plasma diagnostic technique E-mail: jzb2017065@xjtu.edu.cn Homepage: htshi.gr.xjtu.edu.cn

	ZHANG Qiaogen Professor Department: High Voltage Research Area(s): 1: Gas insulation and discharge plasma technology 2: High-power pulse technology and application 3: Insulation diagnosis and life assessment of power equipment E-mail: hvzhang@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/hvzhang
	ZHANG Guanjun Professor Department: High Voltage Research Area(s): 1: Power equipment condition monitoring and fault diagnosis 2: Electrical discharge and plasma 3: Pulse power technology and application E-mail: gjzhang@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/gjzhang
	YANG Lanjun Professor Department: High Voltage Research Area(s): 1: New power equipment 2: Pulse power technology and application E-mail: yanglj@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/yanglj
	XIE Yanzhao Professor Department: High Voltage Research Area(s): 1: High-power electromagnetic environment and electromagnetic pulse 2: Electromagnetic transient phenomena of power system and fault diagnosis of power equipment 3: Electromagnetic compatibility theory and experimental technology 4: Compact pulse power source and radiation physics applications 5: Laser and fiber optic sensing E-mail: yzxie@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/xyz

	LI Hongjie Professor Department: High Voltage Research Area(s): 1: Power equipment status detection and diagnosis 2: IED, status monitoring and fault location in smart grid 3: Life assessment of key components in pulsed power systems E-mail: hjli@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/hjli
	JI Shengchang Professor Department: High Voltage Research Area(s): 1: Service characteristics of power equipment and its status assessment 2: DC system and equipment failure mechanism and diagnosis 3: Vibration and noise control and application of AC and DC equipment E-mail: jsc@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/hvs102
	LI Jiangtao Professor Department: High Voltage Research Area(s): 1: Power system overvoltage and insulation 2: Pulse power technology 3: Electromagnetic organism E-mail: li_jiangtao@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/jtli
	SUN Anbang Professor Department: High Voltage Research Area(s): 1: Electrical discharge and plasma and their applications 2: Electric propulsion and special propulsion technology 3: Plasma high performance numerical simulation technology E-mail: anbang.sun@xjtu.edu.cn Homepage:

	http://gr.xjtu.edu.cn/web/anbang.sun/home
	DING Weidong Professor Department: High Voltage Research Area(s): 1: Gas insulation and gas discharge 2: Pulse power technology 3: High voltage measurement E-mail: wdding@xjtu.edu.cn Homepage: http:// wdding.gr.xjtu.edu.cn
	DONG Ming Professor Department: High Voltage Research Area(s): 1: Electrical equipment electrical insulation technology 2: Power equipment test, detection and fault diagnosis technology 3: Electrical equipment condition monitoring and application of artificial intelligence 4: High voltage computing E-mail: dongming@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/dongming
	LI Junhao Associate Professor Department: High Voltage Research Area(s): 1: New field test and measurement technology for power equipment 2: Electrical equipment insulation characteristics and testing technology E-mail: junhaoli@mail.xjtu.edu.cn Homepage: http://ee.xjtu.edu.cn/info/1312/5589.htm
	LIU Xuandong Associate Professor Department: High Voltage Research Area(s): 1: Pulse power technology 2: High voltage test and measurement 3: Gas discharge and application E-mail: liuxuand@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/liuxuand

	LUO Yongfen Associate Professor Department: High Voltage Research Area(s): 1: Power equipment inspection (monitoring) measurement, diagnosis and life assessment 2: New wire and power equipment E-mail: yfluo@mail.xjtu.edu.cn Homepage: http://ee.xjtu.edu.cn/info/1312/5591.htm
	DENG Junbo Associate Professor Department: High Voltage Research Area(s): 1: Overvoltage Simulation and Protection of AC/DC Power System 2: Aging and insulation status diagnosis of power cables 3: Surface charge and discharge measurement of insulators in GIS E-mail: dengjb@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/dengjb
	ZHAO Junping Associate Professor Department: High Voltage Research Area(s): 1: Study on SF6 discharge phenomenon and its application: SF6 gas/gas-solid interface discharge characteristics, UHV GIS defect diagnosis 2: Research on low-pressure discharge phenomenon and its application: pseudo-spark discharge phenomenon and pseudo-spark electron beam source research, application of pseudo-spark electron beam source in preparation of high-power terahertz radiation source and nano-functional film 3: Study on electrical explosion discharge of wire and its application in preparation of metal/metal compound nano powder E-mail: junping_zhao@mail.xjtu.edu.cn Homepage: http://ee.xjtu.edu.cn/info/1312/5866.htm

	MU Haibao Associate Professor Department: High Voltage Research Area(s): 1: Power equipment condition monitoring and fault diagnosis 2: Electrical discharge and plasma applications 3: High voltage testing technology E-mail: haibaomu@mail.xjtu.edu.cn Homepage: http://ee.xjtu.edu.cn/info/1312/5610.htm
	ZHU Lingyu Associate Professor Department: High Voltage Research Area(s): 1: Vibration mechanism and noise reduction measures of filter capacitor in HVDC transmission project 2: Electromagnetic transient analysis of multi-terminal flexible direct current transmission engineering based on MMC 3: Series arc fault characteristics and detection method in DC power system 4: DC bias phenomenon and suppression measures of HVDC transmission 5: State evaluation of main equipment in HVDC transmission project E-mail: zhuly1026@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/hvly/home
	REN Ming Associate Professor Department: High Voltage Research Area(s): 1: Power equipment insulation fault detection and diagnosis 2: High voltage test new technology 3: Basic characteristics, mechanism and application of gas discharge 4: Novel functional dielectric material and characterization method 5: Distribution network distributed monitoring technology E-mail: renming@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/renming/1

	PANG Lei Associate Professor Department: High Voltage Research Area(s): 1: Gas discharge phenomenon and theory 2: High voltage power electronics E-mail: panglei_2013@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/panglei1981
	CHANG Zhengshi Associate Professor Department: High Voltage Research Area(s): 1: Gas discharge phenomenon and mechanism research 2: Atmospheric pressure low temperature plasma generation technology, parameter diagnosis and active component regulation 3: Study on the interaction mechanism between atmospheric pressure low temperature plasma and solid dielectric material surface 4: Application Research of Atmospheric Pressure Low Temperature Plasma in the Field of Sterilization and Fresh Waste Treatment E-mail: zschang1984@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/zschang1984
	GUO Jun Associate Professor Department: High Voltage Research Area(s): 1: Study on the mechanism of strong electromagnetic environment generation and propagation 2: Study on electromagnetic pulse coupling of multi-conductor transmission line 3: Strong electromagnetic environment generation and simulation technology 4: Strong electromagnetic environment effect test technology 5: Research on Evaluation Method of Strong Electromagnetic Environment Effect 6: Research on strong electromagnetic environment safety of national key infrastructure 7: Research on Thunderbolt Mechanism and Lightning Protection Technology of Aircraft

	8: Power equipment fault diagnosis technology E-mail: junguo@mail.xjtu.edu.cn Homepage: http://ee.xjtu.edu.cn/info/1312/5858.htm
	ZHAGN Baohui Professor Department: Power System Research Area(s): 1: Theory and device of power system safety and stability control system: power system safety and stability identification and prediction theory, power system emergency control theory, safety and stability control system realization technology and device 2: New Relay Protection for Power Systems: New Principles of Relay Protection, New Relay Protection Devices, State Detection and Protection Systems, and New Technologies Related to Relay Protection 3: Power system communication: high-speed carrier theory and technology of power line, access network technology using high-speed carrier of power line, theory and method of "triple play" of telephone, computer and power E-mail: BHZhang@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/bhzhang
	FANG Wanliang Professor Department: Power System Research Area(s): 1: Power system operation analysis and control E-mail: eewlfang@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/eewlfang
	WANG Xiuli Professor Department: Power System Research Area(s): 1: Power system planning 2: Electricity Market 3: Power system reliability 4: Power System Analysis 5: New transmission method E-mail: xiuliw@mail.xjtu.edu.cn

	Homepage: http://gr.xjtu.edu.cn/web/xiuliw
	DU Zhengchun Professor Department: Power System Research Area(s): 1: Power system operation and control E-mail: zcdu@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/zcdu
	KANG Xiaoning Professor Department: High Voltage Research Area(s): 1: Power System Protection 2: Substation integrated automation system 3: Smart grid E-mail:kangxn@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/kangxn
	BIE Zhaohong Professor Department: Power System Research Area(s): 1: Power System Planning and Reliability Assessment 2: New energy access system research E-mail: zhbie@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/zhbie
	SONG Guobing Professor Department: Power System Research Area(s): 1: Relay protection and fault location of AC and DC power grids 2: Relay protection for new energy power systems 3: Relay protection of distribution network E-mail: song.gb@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/song.gb

	HAO Zhiguo Professor Department: Power System Research Area(s): 1: Power transformer protection and safe operation 2: AC and DC power grid relay protection principle 3: New energy power system protection and control E-mail: zhghao@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/zhghao
	WANG Jianxue Professor Department: Power System Research Area(s): 1: New energy power system planning and operation 2: Microgrid design and operation control 3: Electricity market, power economy and demand side management E-mail: jxwang@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/jxwang
	JIAO Zaibin Associate Professor Department: Power System Research Area(s): 1: Power transformer protection 2: Relay protection of AC/DC hybrid power grid E-mail: jiaozaibin@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/jiaozaibin
	ZHENG Tao Associate Professor Department: Power System Research Area(s): 1: Power system communication 2: Distribution network automation E-mail: tzheng@mail.xjtu.edu.cn Homepage: http://ee.xjtu.edu.cn/info/1313/5701.htm
	LIU Jun Associate Professor Department: Power System Research Area(s): 1: Analysis and control of new energy grid-connected operation 2: FACTS and HVDC technology 3: Big Data and Machine Learning in Power Systems

	E-mail: eeliujun@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/eeliujun
	LI Chongtao Associate Professor Department: Power System Research Area(s): 1: Power System Stability Analysis and Control E-mail: lichongtao@mail.xjtu.edu.cn Homepage: http://ee.xjtu.edu.cn/info/1313/5576.htm
	LI Gengfeng Associate Professor Department: Power System Research Area(s): 1: Power system reliability 2: Integrated energy system 3: Active power distribution system E-mail: gengfengli@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/gengfengli
	DING Tao Associate Professor Department: Power System Research Area(s): 1: Electricity Market 2: Power system optimization operation 3: New energy grid connection and energy internet E-mail: tding15@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/tding15
	ZHANG Yao Associate Professor Department: Power System Research Area(s): 1: Energy forecast 2: Power system planning 3: Electricity Market E-mail: yaozhang_ee@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/yaozhang_ee

	MENG Yongqing Lecturer Department: Power System Research Area(s): 1: New energy grid 2: Flexible AC Transmission System (FACTS) 3: Frequency division transmission system and high voltage direct current transmission E-mail: mengyq@mail.xjtu.edu.cn Homepage: http://ee.xjtu.edu.cn/info/1313/5608.htm
	WU Xiong Lecturer Department: Power System Research Area(s): 1: Microgrid energy management 2: Integrated energy system 3: New energy grid E-mail: wuxiong@mail.xjtu.edu.cn Homepage: http://ee.xjtu.edu.cn/info/1313/5711.htm
	YAN Chenguang Lecturer Department: Power System Research Area(s): 1: Research on Fault Mechanism and Relay Protection of Power Equipment 2: Multiphysics coupling modeling and calculation 3: Field test and measurement technology for power equipment E-mail: chgyan@mail.xjtu.edu.cn Homepage: http://ee.xjtu.edu.cn/info/1313/5810.htm
	SHAO Chengcheng Lecturer Department: Power System Research Area(s): 1: Power energy system planning 2: Power system scheduling and electricity market E-mail: ccshao3@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/ccshao3

	QIN Boyu Associate Professor Department: Power System Research Area(s): 1: Power System Stability Analysis and Control 2: Input-state stability theory 3: New energy generation and microgrid E-mail: qinboyu@xjtu.edu.cn Homepage: http://ee.xjtu.edu.cn/info/1313/5709.htm
	LI Yujun Associate Professor Department: Power System Research Area(s): 1: New energy power system frequency stability control 2: Dynamic Behavior Analysis of AC/DC Hybrid System 3: Fault Analysis and Stability Control of AC/DC System E-mail: yujunli@xjtu.edu.cn Homepage: yujunli.gr.xjtu.edu.cn
	XIE Haipeng Lecturer Department: Power System Research Area(s): 1: Ubiquitous power Internet of Things risk analysis 2: Power System Reliability Assessment and Planning 3: DC grid operation and planning E-mail: haipengxie@mail.xjtu.edu.cn Homepage: http://haipengxie.gr.xjtu.edu.cn
	PENG Zongren Professor Department: Electrical Insulation Research Area(s): 1. Optimum design of power equipment insulation structure and simulation analysis of complex field; 2. Study on EHV/UHV substations, line's external insulation and voltage equalization characteristics; 3. The formation mechanism and measurement technology of space charge in dielectrics; 4. Research on interface effect and micro-mechanism of composite insulation system; 5. Research on on-line monitoring technology of high voltage line insulators; 6. Study on material, structure and electrical

	characteristics of HVDC bushing. E-mail: zrpeng@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/zrpeng
	ZHONG Lisheng Professor Department: Electrical Insulation Research Area(s): 1. Dielectric and electrical insulation technology; 2. Polymer photoelectric materials and devices; 3. Biodielectrics and their applications. E-mail: lszhong@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/lszhong
	LI Shengtao Professor Department: Electrical Insulation Research Area(s): 1. Dielectric theory and its application; 2. Research on electrical functional materials and devices; 3. Insulation materials and technology under extreme conditions. E-mail: sli@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/sli
	CHENG Yonghong Professor Department: Electrical Insulation Research Area(s): 1. Dielectric properties of dielectric materials; 2. Failure mechanism and modification of dielectric materials under extreme conditions; 3. Insulation deterioration mechanism of power equipment; 4. On-line monitoring and fault diagnosis technology. E-mail: cyh@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/cyh

	YAO Xueling Professor Department: Electrical Insulation Research Area(s): 1. High voltage and large current automation control and testing technology; 2. Biological effects of pulsed electromagnetic fields; 3. Research on pulse power technology; 4. Basic theory and test technology of over-voltage protection apparatus in information system. E-mail: xlyao@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/xlyao
	WU Kai Professor Department: Eelctrical Insulation Research Area(s): 1. Electrical aging and breakdown theory of insulating materials; 2. Partial discharge detection and internal mechanism research; 3. Rational optimization of urban energy system. E-mail: wukai@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/wukai
	XU Yang Professor Department: Electrical Insulation Research Area(s): Electrical insulation testing technology 1. Partial discharge testing technology for HVDC cables; 2. Optical fiber sensing technology of partial discharge ultrasound; 3. Vegetable oil impregnated high temperature paper insulation system for transformers. E-mail: xuyang@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/xuyang

	LI Jianying Professor Department: Electrical Insulation Research Area(s): 1. Dielectric physics and its application; 2. Insulation material and electrical insulation technology; 3. Functional dielectrics. E-mail: lijy@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/lijy
	HAN Xiaogang Professor Department: Eelctrical Insulation Research Area(s): 1. Research on energy storage mechanism and devices, including solid-state lithium batteries, lithium-metal batteries, lithium-sulfur batteries, high energy density supercapacitors, etc; 2. Basic and applied research of composite energy storage technology, including energy storage for distribution network, energy storage for new energy, indoor energy storage, etc; 3. Cross-border application research of two-dimensional nanomaterials, including graphene, boron nitride, etc. E-mail: xiaogang.han@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/xiaogang.han/home http://cne.xjtu.edu.cn/info/1028/1132.htm
	LIU Wenfeng Professor Department: Eelctrical Insulation Research Area(s): 1. Dielectric materials; 2. Functional materials. E-mail: liuwenfeng@mail.xjtu.edu.cn Homepage:

	XIAO Bing Professor Department: Eelctrical Insulation Research Area(s): 1. First-principles theoretical design and calculation of new 2D energy storage and energy conversion materials; 2. Molecular dynamics simulation and simulation of thermal effect of nano-micron scale electrode discharge; 3. First-principle molecular dynamics studies of the high temperature and high pressure state and phase diagrams; 4. Measurement and application of exchange correlation energy in density functional theory. E-mail: bingxiao84@mail.xjtu.edu.cn Homepage: https://www.researchgate.net/profile/Bing_Xiao4?ev=prf_act
	LIU Xuezhong Associate Professor Department: Eelctrical Insulation Research Area(s): 1. Power equipment and electromagnetic field analysis and optimum design of high voltage converter valve; 2. Insulation state assessment and detection of frequency conversion and wind turbine; 3. Transient analysis and insulation coordination of wind farm and power cable system; 4. Corona protection design and measurement of high voltage motor. E-mail: xliu@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/xliu
	HE Bo Associate Professor Department: Eelctrical Insulation Research Area(s): 1. External insulation of high voltage transmission lines; 2. Photoelectric detection technology of transient strong electric field; 3. Stability analysis technology of tower-line coupled structures. E-mail: hebo@mail.xjtu.edu.cn

	Homepage: http://gr.xjtu.edu.cn/web/hebo
	SHI Jianwen Associate Professor Department: Eelctrical Insulation Research Area(s): 1. Design, synthesis and application of novel nano-photocatalytic, electrocatalytic and photocatalytic materials; 2. Preparation and application of flue gas low temperature denitration catalyst; 3. Activity evaluation and regeneration of industrial denitrification catalyst. E-mail: jianwen.shi@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/jianwen.shi/home
	WANG Xia Associate Professor Department: Eelctrical Insulation Research Area(s): 1. Research and development of new high voltage dc cable and dc material; 2. Space charge measurement technology in polymer insulation; 3. Design of high voltage cable accessories and fault diagnosis technology. E-mail: wxflying@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/wxflying
	LIU Ying Associate Professor Department: Eelctrical Insulation Research Area(s): 1. Design of electrical insulation structure; 2. Power cable; 3. Insulation testing technology. E-mail: candyly@xjtu.edu.cn Homepage:

	ZHANG Jinying Associate Professor Department: Eelctrical Insulation Research Area(s): 1. Study on synthesis and mechanism of one-dimensional novel nanomaterials; 2. Synthesis and application of fullerenes, carbon nanotubes, graphene and graphene-like materials; 3. Synthesis and application of new nano-materials with high conductivity, high insulation and high insulation; 4. Synthesis and application of new fluorescent semiconductor nanomaterials. E-mail: jinying.zhang@mail.xjtu.edu.cn Homepage: http://cne.xjtu.edu.cn/info/1028/1131.htm http://gr.xjtu.edu.cn/web/jinying-zhang/
	LIU Peng Associate Professor Department: Eelctrical Insulation Research Area(s): 1. Optimum design and multi-physical field simulation of insulation structure of power equipment; 2. Study on space charge characteristics and measurement technology of polymers; 3. Research on key technologies of high-end ac and dc bushing; 4. Research on new transmission technology; 5. State perception and reliability analysis of electric power equipment. E-mail: pengliu@mail.xjtu.edu.cn Homepage:
	WANG Hongkang Associate Professor Department: Eelctrical Insulation Research Area(s): 1. Electrochemical energy storage materials and devices (lithium/sodium ion batteries, supercapacitors, etc.); 2. Synthesis and application of nanomaterials (heat conduction, insulation); 3. Materials and devices of solar cells (perovskite type, sensitized type). E-mail: hongkang.wang@mail.xjtu.edu.cn

	Homepage:http://cne.xjtu.edu.cn/info/1028/1128.htm
	CHEN Wei Associate Professor Department: Eelctrical Insulation Research Area(s): 1. Electrical functional materials; 2. Ferroelectric materials. E-mail: weic@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/weic
	ZHANG Hong Associate Professor Department: Eelctrical Insulation Research Area(s): 1. Photoelectric functional dielectric materials and devices; 2. Material and preparation technology of solar cells; 3. Biomedia material and bioelectromagnetic effect. E-mail: hzhangxu@mail.xjtu.edu.cn Homepage:
	CHEN Xin Associate Professor Department: Eelctrical Insulation Research Area(s): 1. Chemical, physical and mechanical properties simulation of energy storage/new energy materials; 2. Transient stability, network topology and stochastic optimal management strategy of smart grid; 3. Research on nano/molecular scale energy and particle transfer processes, and related quantum dynamics simulation algorithms for complex systems; 4. Application of large data and Machine (Deep) Learning in various computational studies, power grid simulation, materials, physical chemistry. E-mail: xin.chen.nj@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/xin.chen.nj

	XU Man Associate Professor Department: Eelctrical Insulation Research Area(s): 1. Study on properties and applications of polymer materials; 2. Properties and applications of nanocomposite dielectrics. E-mail: xumman@mail.xjtu.edu.cn Homepage:
	GAO Jinghui Associate Professor Department: Eelctrical Insulation Research Area(s): 1. Functional dielectrics and their applications in piezoelectric, dielectric, energy storage and etc.; 2. High voltage insulation technology; 3. Bioelectromagnetic effect. E-mail: gaojinghui@mail.xjtu.edu.cn Homepage: https://www.researchgate.net/profile/Jinghui_Gao http://gr.xjtu.edu.cn/web/gaojinghui
	ZHOU Jun Associate Professor Department: Eelctrical Insulation Research Area(s): 1. Synthesis and application of electrode materials for reversible solid oxide batteries; 2. Optimization and integration technology of new energy conversion system; 3. Synthesis and electrochemical properties of nano-oxide catalysts; 4. Interface design of polymer insulation composites; 5. Electrothermal coupling characteristics of nano-scale insulating materials. E-mail: zhoujun@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/zhoujun/home1

	MENG Guodong Associate Professor Department: Eelctrical Insulation Research Area(s): 1. Insulation performance evaluation and discharge plasma characteristics at micro-nano scale; 2. Two-dimensional materials synthesis, characterization technology and design and two-dimensional devices development; 3. Insulation state assessment and detection and diagnosis technology of electric power equipment; 4. Development and performance improvement of advanced dielectrics. E-mail: gdmengxjtu@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/gdmeng
	MENG Yongpeng Lecturer Department: Eelctrical Insulation Research Area(s): 1. Insulation aging mechanism and life assessment; 2. Partial discharge theory and detection technology; 3. On-line detection and fault diagnosis of electric power equipment. E-mail: mypphd@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/mypphd
	JIA Lixin Professor Department: Power Electronics and Automation Research Area(s): 1. Industrial intelligent control system; 2. Fieldbus control system; 3. Intelligent instruments for electrical measurement. E-mail: lxjia@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/ lxjia

	YANG Xu Professor Department: Power Electronics and Automation Research Area(s): 1. Power electronics integration technology; 2. Switching power supply technology; 3. Automatic control technology. E-mail: yangxu@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/yangxu
	WANG Yue Professor Department: Power Electronics and Automation Research Area(s): 1. The application of power electronics technology in power quality control, power transmission and distribution system and distributed new energy system; 2. High-power power electronic transmission technology; 3. The application of embedded control system in power electronic devices. E-mail: yuewang@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/yuewang
	LIU Jinjun Professor Department: Power Electronics and Automation Research Area(s): 1. The application of power electronics technology in power quality control and transmission and distribution system; 2. Power electronic converters and control for micro-grid and future grid with new energy and distributed generation; 3. Modeling, simulation, analysis and control of power electronic circuits and systems. E-mail: jjliu@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/jjliu

	XIAO Guochun Professor Department: Power Electronics and Automation Research Area(s): The fields of power electronics and power transmission, include: power quality analysis and control technology; power electronics system modeling, simulation and control; distributed generation technology; power electronics device design and application technology, etc. E-mail: xgc@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/xgc
	ZHUO Fang Professor Department: Power Electronics and Automation Research Area(s): 1. Power quality integrated control technology; 2. Grid-connected technology of new energy generation; 3. Power electronic converter control technology in micro-grid; 4. Impedance measurement method and stability analysis of micro-grid system. E-mail: zffz@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/zffz/1
	PEI Yunqing Professor Department: Power Electronics and Automation Research Area(s): 1. DC-DC converter topology and control technology; 2. Topology and control technology of high power special power supply. E-mail: peiyq@xjtu.edu.cn Homepage:

	HE Yingjie Associate Professor Department: Power Electronics and Automation Research Area(s): 1. Power quality control technology; 2. Multilevel inverter and its control technology; 3. Application of power electronics in power system. E-mail: yjhe@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/ yjhe
	HU Feihu Associate Professor Department: Power Electronics and Automation Research Area(s): 1. Big data and deep learning and their application; 2. Research on a new generation power market simulation system with high proportion of renewable energy; 3. Development of internet of things, embedded system and industrial intelligent control system. E-mail: hufeihu@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/hufeihu
	JIA Yaoqin Associate Professor Department: Power Electronics and Automation Research Area(s): 1. Power electronic digital control: theoretical analysis of digital control system and software design of digital control algorithms; 2. Distributed generation system: smart grid and micro-grid. E-mail: yaotsin@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/yaotsin

	SHEN Chuanwen Associate Professor Department: Power Electronics and Automation Research Area(s): 1. Electric drive; 2. AC speed regulation; 3. Wind power generation; 4. Inverter development. E-mail: scw@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/scw
	CHEN Gang Associate Professor Department: Power Electronics and Automation Research Area(s): 1. Computer control; 2. Electrical control equipment; 3. Testing instruments; 4. Industrial network. E-mail: gchen@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/gchen
	SI Gangquan Associate Professor Department: Power Electronics and Automation Research Area(s): 1. Industrial intelligent soft sensing and industrial intelligent control; 2. Industrial wireless sensor networks; 3. Nonlinear systems and complex networks. E-mail: gangquan@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/gangquan
	GAN Yongmei Associate Professor Department: Power Electronics and Automation Research Area(s): 1. Supervisory control of discrete event systems; 2. Computer control technology and embedded system; 3. Control network and communication. E-mail: ymgan@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/ymgan

	ZHANG Xiaotian Associate Professor Department: Power Electronics and Automation Research Area(s): 1. Flexible DC transmission technology; 2. Power electronics digital control technology. E-mail: xiaotian@xjtu.edu.cn Homepage:
	ZHANG Yan Associate Professor Department: Power Electronics and Automation Research Area(s): 1. Topology, modeling and control theory of power electronic converter in distributed power system; 2. High frequency, high efficiency and high power density resonant converter soft switching topology and digital control technology; 3. Reliability of power electronic devices and systems. E-mail: zhangyanjtu@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/zhangyanjtu
	WANG Feng Associate Professor Department: Power Electronics and Automation Research Area(s): 1. New energy power generation technology; 2. High-power power electronic converter technology; 3. Reliability optimization technology of power electronic devices. E-mail: fengwangee@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/fengwangee
	LEI Wanjun Associate Professor Department: Power Electronics and Automation Research Area(s): 1. Application of power electronics technology in power system; 2. Renewable energy access and power quality control technology; 3. Customized power supply technology. E-mail: leiwanjun@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/leiwanjun

	YI Hao Associate Professor Department: Power Electronics and Automation Research Area(s): 1. Power quality control and high-quality power supply technology; 2. Micro-grid control technology; 3. Modeling and control of grid-connected converter. E-mail: yi_hao@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/yi_hao
	WANG Laili Professor Department: Power Electronics and Automation Research Area(s): 1. Wide band-gap power semiconductor packaging integrated technology; 2. High frequency power conversion technology; 3. Radio power transmission technology. E-mail: LLwang@mail.xjtu.edu.cn Homepage:
	LIU Zeng Associate Professor Department: Power Electronics and Automation Research Area(s): 1. Parallel and grid-connected control of energy storage converters in distributed generation systems; 2. Small signal modeling and stability analysis of AC/DC power electronic system; 3. Design and high performance control of large capacity isolated DC converter system. E-mail: zengliu@xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/zengliu

	CAO Hui Professor Department: Power Electronics and Automation Research Area(s): 1. Industrial intelligent control and its application in electrical engineering; 2. Data mining and pattern recognition; 3. Knowledge representation and knowledge discovery. E-mail: huicao@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/huicao
	HU Hongli Professor Department: Electrical Measurement and Instrument Research Area(s): 1. Visual multiphase flow detection and process control in ECT; 2. State monitoring and fault diagnosis of electric power equipment; 3. Graphene-based energy storage materials and energy storage devices, sensitive materials and sensors. E-mail: hlhu@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/hlhu
	ZHANG Yong Professor Department: Electrical Measurement and Instrument Research Area(s): 1. Advanced nano-sensor technology and its intelligent system; 2. Diagnostic technology of gas discharge plasma for major equipment in power system. E-mail: zhyong @xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/zhyong

	DING Hui Professor Department: Electrical Measurement and Instrument Research Area(s): 1. Application of new optical fiber sensing technology in state detection of electric power equipment; 2. Intelligent sensing system and instrument design. E-mail: dinghui@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/dinghui
	TANG Xiaojun Professor Department: Electrical Measurement and Instrument Research Area(s): 1. On-line monitoring of electrical equipment operation status; 2. Mine safety prediction; 3. Gas logging in exploration wells; 4. Intelligent instrument and intelligent control; 5. Nanometer gas sensor; E-mail: xiaojun_tang@mail.xjtu.edu.cn Homepage: http://gr.xjtu.edu.cn/web/xiaojun_tang
